COURSE DESCRIPTION

This course is taught to the National Standards and provides the participants with a Completion Certification. The Standard course is more than the 130 hours of instruction required by Title 22. At the completion of the course, the student will be eligible to take the National Registry Exam.

Didactic portion of the class includes lecture on all aspects of basic anatomy and physiology, medical terminology and treatment guidelines.

Skills portion of the class is designed to provide the student with actual experience of dealing with patients. This is a hand's on approach to the skills you will use in the field. The participant must pass the skills examination prior to taking the certifying exam. This meets the skill requirement for the State.

Prerequisites:

Must have a valid American Heart Association Healthcare Provider CPR Cert.

Basic understanding of Anatomy and Physiology and Medical Terminology

Top 5 Reasons to choose us

- Affordability
- Fast and Thorough Training
- Recognized for Excellence
- Expert Instructors.
- Hands on Training

"The best part of the class was the regular high-stress situations that the instructor, set up for us.

Not only did I gain valuable quick-thinking experience for the field, I have learned a lot about myself and how I'll react in a real life-or-death situation."
